

CAPTEC

Tried, Tested and Trusted

Innovate to succeed

A company that embraces a positive approach to innovation will ultimately out-perform those who fear or avoid it.

Whether you need to improve functionality or performance, or to streamline costs, Captec will deliver the results you require.

In a world increasingly reliant on technology, you need a technology partner that enables you to realise your organisation's ability to innovate and deliver competitive advantage.

We innovate to help you succeed

Captec systems are designed to provide answers, whatever the questions, whether how to replace obsolete systems, improve efficiency, or create tailored solutions.

Captec's innovative and practical Industrial Computing and Communications solutions are based on our extensive knowledge and experience.

Retail

Our commitment is to provide the best value technological solution – and by that, we mean the best for your organisation. We do that by combining the knowledge, skills and motivation required to ensure you achieve positive benefits.

The only standard we work to is the highest

We're not constrained in our thinking by what has been available until now. We believe that anything is possible.

With Captec, you can always be one step ahead.

If what you require doesn't as yet exist, we'll work with you to develop a solution.

If the challenges you are facing appear daunting, why not talk to us? We'll not only help find the best route forward, we'll also support and work with you along the way.

Tried, Tested and Trusted

Your Technology Partner

Leading-edge products, solid engineering expertise and a comprehensive operational and logistical support – that's what our customers expect when they choose a Captec industrial PC. Our customers trust in the skill and experience of Captec's team of engineers and technicians to deliver the most appropriate solution for their applications – on time, cost-efficient, and meeting the highest quality requirements.

● CUSTOMIZED

Using our extensive in-house facilities and design capabilities, we can deliver individually tailored solutions that meet our customer's specific requirements.

Our ability can be demonstrated by our 20 year track record in major infrastructure projects and delivering bespoke solutions on time, within budget, and meeting every quality requirement.

● QUALITY ASSURED

All our systems and custom design capability are managed within the scope of an ISO 9001:2000 accredited quality management system, assuring you of the integrity of our products and bespoke solutions.

Our products are exhaustively soak tested and supported by a comprehensive Captec warranty.

Captec's structured skills matrix based management system makes sure our customers receive the highest possible standards of build quality and workmanship.

Our comprehensive build files for every product ensure consistency of build and production standards.

● TRACEABILITY AND CHANGE CONTROL

All our products are assembled and documented in accordance with a System Configuration Log, assuring full component traceability, which is key to the systematic identification of any field failure modes, and compliance with the most stringent of industry standards.

Our Change Control Management procedures ensure continuity of supply for agreed system configurations, and overcome any component obsolescence issues in our fast moving industry where decreasing product life cycles are prevalent.

● SOLUTIONS FOR THE FUTURE

Our solutions must keep pace with your future demand. We use open technologies to deliver modular systems which are not only effective and cost-efficient today, but flexible and scalable to support tomorrow's applications.

Through our relationships with World-class technology partners, our customers will always have access to the best possible performing systems and developments.

● DEDICATED CUSTOMER SERVICE

Excellent customer care is our primary objective. Our team of Technical Support staff are always available to listen and advise.

Backed by in-house subject experts, we will always provide a high quality and timely response, and our modern test and repair facilities ensure that we are able to maintain market leading levels of service.

● ON TIME DELIVERY

We aim to help your business succeed. We pride ourselves on our ability to deliver to agreed time schedules. Captec's combination of lean principles and best practice, with our 17,000sq ft state of the art facility, ensures that we can respond to our customer's most challenging requirements.

● WE MEET YOUR EVERY REQUIREMENT

In recognition of the increasing deployment of networked computer systems, Captec's portfolio and expertise encompasses both industrial computers and communications. We aim to offer a single point of contact for all our customers' requirements.

...across all boundaries

Transport

"We have been impressed with the build quality and the level of service provided by CAPTEC and we plan to continue to rely on their support and expertise for the future."

Michael Negrette, Hardware Engineer,
Kvaerner Oilfield Products Limited

"The joint development project for our customized computer system was handled very successfully, leading to full production with excellent customer focus."

Steve Marnier, Elekta Ltd

"As a key partner in this successful project, Captec have always provided a highly professional service, delivered on time, and offered an excellent level of technical service and support."
