## CAPTEC

Tried, Tested and Trusted

## About us

Captec designs and manufactures application ready computer systems for medical OEM manufacturers to incorporate in their equipment.

We work in close partnership with leading global manufacturers helping in defining, designing and supply managing the computer technology that sits within leading edge medical equipment.

Our computer systems are operated in the highly regulated medical industry, where all equipment and services are subject to rigorous approvals, through numerous world wide standards agencies.

# Application Ready Computer Systems for Medically Certified Equipment

## Requirements and issues

Modern medical equipment is increasingly complex and software IP centric. Core to the reliable operation of such equipment are stable and dependable computer hardware and operating systems.

Since 1985 Captec has built up a wealth of experience in designing and supplying industrial grade, high availability and reliability PC based computer systems to a wide range of medical customers.

We understand the requirements of the industry and the key issues surrounding IT technology in medical applications.

### We address:

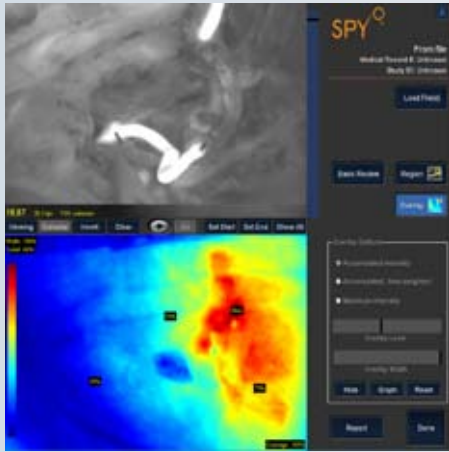

- Best of breed Technology Selection
- Manufacturing Quality
- Change Control Management
- Obsolescence Management
- Supply Chain Management
- Traceability
- Compliance & Certification
- Through Life Management

## The value proposition

- ✓ Proven experience in medical applications, both small and large scale, with long term roll-outs.
- ✓ Specialist experience and knowledge of open standard industrial PC technologies to future proof computing platforms.
- ✓ Proven ability to comply with medical standards requirements.
- ✓ Robust quality and manufacturing management controls system with total system component traceability.
- ✓ Well established company since 1985 with a proven track record and financial robustness to minimise supplier risk.
- ✓ Complete complement of multi-disciplinary specialist technical resources for design, technical support, testing, documentation, certification and compliance, to work in collaboration with you to design best-fit computing platforms.
- ✓ Proven ability in supply chain management of highly volatile components.
- ✓ Robust change control processes to manage change and obsolescence.
- ✓ Partnering relationships with industry leading manufacturers such as Microsoft, Intel, nVidia and many others.
- ✓ Financial flexibility to accommodate multi-currency transactions (Euro, Dollars and Stirling).
- ✓ Bill of Material cost reduction by leveraging COTS component technologies.
- ✓ Future proofing of computing platforms by the use of open standard PC architectures.
- ✓ Proven project management risk reduction, working with an industry leader with a Tried, Tested and Trusted reputation.

We've got  
**the edge**  
IN INDUSTRIAL COMPUTERS

**OUR PURPOSE** - To be the recognised global leader in the design and manufacture of reliable and affordable industrial computers fit for demanding environments.

**OUR VISION** - A world where computers can operate reliably in any environment for the benefit of mankind.

INVESTORS IN PEOPLE

**Strenuis Ardua Cedunt** - Difficult things fall to the strong
