CAPTEC

HIGHLY CERTIFIED, CRITICAL, OR CHALLENGING ENVIRONMENTS? THINK CAPTEC.

Established in 1985, Captec is an award-winning designer and end-to-end provider of Specialized Computers, Integrated Systems, Subsystems and Smart Edge & IoT platforms. By combining our decades of experience with cutting-edge technical expertise, we help our customers to expertly navigate the complexities of this ever-advancing landscape.

We achieve this by collaborating closely with our customers' teams, understanding and addressing the unique challenges of their application environments. Since our expansion into North America in 2006 we've earned a reputation for quality, service excellence, and a relentless commitment to exceeding customer expectations across a broad range of industrial and commercial sectors.

Together, we deliver meaningful value where it matters most, enabling those organizations to thrive in a dynamic and demanding world.

OUR SECTORS

AUTOMATION

TRANSPORT

LEISURE

HEALTHCARE

ENERGY

DEFENSE

COMMUNICATIONS

SPECIALIZED COMPUTERS

Servers

High-performance industrial, rugged, and secure-encrypted servers with scalable CPU & GPU configurations, available in 1U - 6U and fully custom form factors.

Workstations

Industrial, rugged, and portable workstations with modular architectures, offering customizable I/O and connectors, and integration of customer electronics or additional payloads.

Embedded

Industrial, rugged, and IoT embedded computers designed for OEM and space-constrained applications, offering AC or DC power options and fanned or fanless cooling configurations.

Panel PCs

Offering the complete solution, our fully configurable industrial and rugged panel PCs are available with various CPUs, screen sizes, and IP ratings.

Displays

Versatile rugged displays in 19" or other form factors, with various screen sizes and KVM packages available to suit your application requirements.

Tablets

Custom-built industrial and rugged tablets, with charging stations, engineered for durability and functionality, where full ruggedization isn't needed.

INTEGRATED SYSTEMS

Rack Cabinets

Standard and rugged rack cabinets in full-, half-, or custom-heights and depths, meeting advanced thermal, power, EMC, and customer specific integrated payloads.

Portable Racks

Portable, high-performance solutions offering SWaP optimization as well as integrated shock and IP-rated protection for the harshest environments.

Consoles

Standard and rugged consoles, fully customizable with ergonomic configurations, offering build-to-print or design-to-order integration for customer-specific applications.

Rack Accessories

Optimize rack space and functionality, including custom cable management, carrier trays, control panels, EMUs, and switches.

Environmental Control

Advanced environmental control, fire suppression, and thermal management ensuring reliability and safety even in the toughest environments.

Power Distribution

Complex and simple PDUs and UPS configurations, ideal for a diverse range of environments, with remote monitoring and environmental control.

SUBSYSTEMS

A key part of Captec's end-to-end offering is the design and manufacture of a diverse range of subsystems, customized to meet the complex demands of your application environments, whether on a build-to-print basis or with design, engineering, and manufacturing support. These offerings include:

- ▼ **Change-Over Systems**
- ▼ **Conversion Units**
- ▼ **Human-Machine Interfaces (HMIs)**
- ▼ **Junction Boxes**
- ▼ **Test Equipment**
- ▼ **Electrical Enclosures**

INTELLIGENT SYSTEMS FOR CRITICAL APPLICATIONS

Captec's end-to-end expertise in supporting customers across challenging, critical, and certified environments has developed a deep understanding of the technological requirements and strict industry standards you must meet.

Through focused innovation and development, Captec has built a high-quality, cutting-edge product portfolio, ranging from configured to fully custom units, designed to meet your exacting requirements for performance, longevity, reliability, budget, and functionality.

SERVICES BUILT AROUND YOUR NEEDS

Captec has focused our expertise into a comprehensive suite of services designed to support customers throughout their lifecycle, ensuring that they realize the full potential of their computing and intelligent systems infrastructure.

DESIGN & ENGINEERING

Captec delivers engineering excellence through custom design, technical support, and build-to-print services. Our in-house teams create reliable, high-performance computing platforms with innovative electronic and mechanical designs, meeting your technical, performance, and budget needs. From custom form factors to security and environmental protection, we design in value across the lifetime of your systems.

MANUFACTURING & INTEGRATION

Captec's subsystems team specializes in metalwork engineering and electro-mechanical solutions. With decades of experience, we provide innovative design, precision engineering, professional finishing, electro-mechanical integration, and build-to-print services. A trusted supply chain partner, providing end-to-end support from prototypes to full production batches.

TESTING & CERTIFICATION

Captec provides testing, compliance, and certification services to help ensure industry standards. Our in-house facilities enable efficient platform assessments and engineering modifications, while close collaboration with third-party test houses ensures seamless certification. From customized test plans to final validation, we support you at every stage, unburdening your teams while maintaining their visibility and control.

SUPPORT & SERVICING

Captec provides custom servicing and lifecycle management to keep your operations efficient and future-ready. We offer preventative maintenance, break-fix services, and online return systems while managing obsolescence and managing change through technology transitions. Our services help customers unburden their teams, reduce costs, simplify updates, and maximize Total Cost of Ownership.

SUPPORTED BY AN INDUSTRY-LEADING ECOSYSTEM

Captec has cultivated a network of technology partners, each a specialist in their field. Our holistic approach allows us to select the best options to meet the unique needs of each customer's project requirements.

By combining these industry-leading technologies with our best-in-class capabilities and services, we deliver enhanced value and comprehensive support to all our customers.
